

While education serves many purposes, an academically-prepared workforce is more important than ever before to a state's (and our nation's) economy. The level of education demanded by today's jobs, especially in the growing fields of science, technology, engineering, and mathematics (STEM), exceeds the supply of available workers. Attaining postsecondary credentials requires a rigorous K-12 academic foundation.

THE ECONOMIC IMPERATIVE	2
High school graduation rates are increasing, but a high school diploma does not necessarily signify college and career readiness. Too few students graduate academically prepared for postsecondary success, as demonstrate by performance on college readiness assessments and/or completion of a rigorous core high school curriculum. Worse, indicators of students' access to and performance in high school courses that would better prepare them	l ed
for college and career are often not tracked by states.

THE ECONOMIC IMPERATIVE

In today's knowledge-based economy, more jobs than ever require a postsecondary credential. Too often, though, the demand for educated workers outstrips the supply. The increasing demand for science, technology, engineering, and mathematics (STEM) jobs may, in part, explain the demand for workers to be more educated than ever before.

The economic indicators below show the importance of an educated workforce and the economic imperative for improving K-12 education so that all students graduate with a high school diploma that prepares them for college, careers, and life.

SUPPLY VS. DEMAND - DOES MINNESOTA HAVE THE EDUCATED **WORKFORCE NEEDED FOR TODAY'S JOBS?**

As policymakers and leaders work to improve employment prospects for their workforce, it's important to take into account the education required for available jobs. The graph below provides a snapshot comparison of the supply of educated workers and the demand for education credentials within the current job market.

²⁰¹³ American Community Survey data.

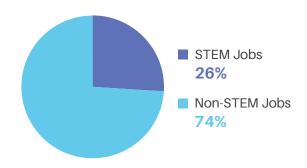

^{**} Burning Glass Technologies job posting data, July 2014-June 2015.

COMPOSITION OF MINNESOTA'S JOB MARKET

Jobs in STEM1 fields are increasingly important to every state's economy. The graphs below demonstrate that STEM jobs represent a significant portion of the state's current job market, as well as the fact that STEM jobs are more likely than non-STEM jobs to require a bachelor's degree or more.

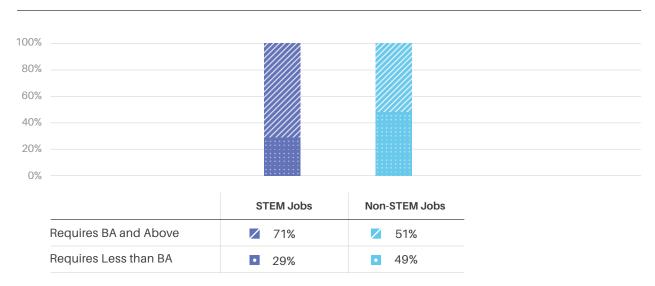

STEM and Non-STEM Jobs*

EDUCATION REQUIREMENTS FOR MINNESOTA'S JOBS

As the STEM job market continues to grow, a rigorous K-12 education with a strong academic foundation and experiences that position them for successful transitions to the additional education and training needed for their selected career path.

STEM and Non-STEM Jobs*

¹ Definition of STEM jobs: The analysis takes a job seeker- and student-centric approach to defining STEM occupations and defines STEM jobs as those that have substantial mathematics and science requirements included within either the standard course of training or the specific qualifications requested in job postings. As a result, "STEM jobs" includes the following occupational areas: science, information technology, engineering, mathematics, and health care.

This approach contrasts with traditional methodologies, which tend to focus only on jobs that are primarily engaged in scientific, mathematical, or technological activity. Examples of jobs that are included in this analysis that are typically excluded from STEM jobs definitions: clinical health care roles that require job seekers to undertake substantial coursework in the biological sciences and a range of "analyst" jobs (such as logistics analysts and business intelligence analysts) that call for significant mathematics training.

^{*} Burning Glass Technologies job posting data, July 2014-June 2015.

COLLEGE- AND CAREER-READY ASSESSMENT **SCORE**

This indicator reports the percentage of students who score at the college- and career-ready level on high school assessments anchored to college- and career-ready standards. These assessments include a performance level/ cut score that provides high school students a clear signal regarding their readiness for first-year mathematics and English courses at postsecondary institutions and is used by colleges and universities for placement into first-year credit-bearing courses.

ACT PERFORMANCE: PERCENTAGE OF STUDENTS MEETING COLLEGE READINESS BENCHMARKS

ACT reports the percentage of ACT-tested high school graduates meeting ACT's College Readiness Benchmarks for each subject area as well as across the four subject areas. These data reflect the performance of both public and non-public school students. These data are available for some but not all subgroups. All students in the cohort took the test, but ACT's participation rate is based upon projections of graduates made by the Western Interstate Commission for Higher Education (WICHE) in 2012 rather than actual graduates.

Percentage Meeting All College Readiness Benchmarks in 2015-16

Participation Rate: 100%	
All Students	29%
American Indian/Alaska Native	7%
Asian	23%
Black	7%
Hispanic	11%
Native Hawaiian/Other Pacific Islander	11%
White	35%
Two or More Races	23%
Low Income	N/R
Students with Disabilities	N/R
Limited English Proficient	N/R

Percentage Meeting College Readiness Benchmarks in 2015-16 by Subject

	READI	ING	ENGL	ISH	MA	TH	SCIEN	ICE
All Students		45%		61%		46%		40%
American Indian/Alaska Native		17%		28%		14%		12%
Asian		35%		50%		43%		31%
Black		18%		27%		15%		11%
Hispanic		25%		36%		22%		18%
Native Hawaiian/Other Pacific Islander		22%		43%		24%		17%
White		52%		70%		54%		47%
Two or More Races		43%		57%		38%		34%

Students with Disabilities		N/R		N/R		N/R		N/R
Limited English Proficient		N/R		N/R		N/R		N/R

STUDENTS ON TRACK TO GRADUATE BASED ON CREDIT ACCUMULATION

Timely credit accumulation is a leading indicator of students' progress toward high school graduation. This indicator shows the percentage of students who are on track to graduate based on the number of credits earned by the end of a particular grade.

Percent of grade 9 students on track to graduate

All Students	N/R
American Indian/Alaska Native	N/R
Asian	N/R
Black	N/R
Hispanic	N/R
Native Hawaiian/Other Pacific Islander	N/R
White	N/R
Two or More Races	N/R
Low Income	N/R
Students with Disabilities	N/R
Limited English Proficient	N/R

Students on track to graduate is reported as N/R because either Minnesota does not report the data or the reporting does not meet Achieve's criteria for this indicator.

ADJUSTED COHORT GRADUATION RATES

The adjusted cohort graduation rate indicates the percentage of 9th graders who graduate from high school in four years or less with a regular high school diploma. This percentage is calculated by dividing the number of graduating students by the number of students who entered high school four years earlier (adjusting for transfers in and out, émigrés, and deceased students). Five-year graduation rates are also reported where available.

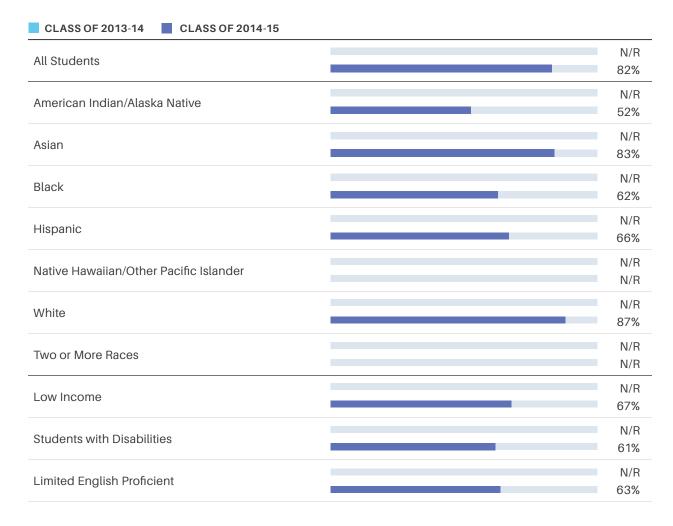

■ 4-YEAR ■ 5-YEAR	CLASS OF 2013-14	CLASS OF 2014-15
All Students	81% 84%	82% N/R
American Indian/Alaska Native	51% 56%	52% N/R
Asian	82% 86%	83% N/R
Black	60%	62% N/R
Hispanic	63% 69%	66% N/R
Native Hawaiian/Other Pacific Islander	N/R N/R	N/R N/R
White	86% 88%	87% N/R
Two or More Races	N/R N/R	N/R N/R
Low Income	66% 72%	67% N/R
Students with Disabilities	58% 65%	61% N/R
Limited English Proficient	64% 72%	63% N/R

Minnesota includes Pacific Islander students as part of the Asian subgroup reporting. Minnesota also regularly reports 5-year graduation rates, but due to a lag in reporting, the 5-year graduation rate data for the Class of 2014-15 were not yet available at the time of this report's release.

COLLEGE- AND CAREER-READY COURSEWORK COMPLETION

Graduation rate alone is often an insufficient indicator of students' readiness for life after high school because the classes and requirements to earn a diploma vary greatly across states. Every state, regardless of its graduation requirements, can and should also publicly report the percentage of the adjusted 9th grade cohort who complete a college- and career-ready course of study while in high school.

Achieve considers states' mathematics and ELA/literacy high school graduation requirements to be at the CCR level if students are expected to complete a course of study aligned with state-adopted CCR standards, which typically includes at least three years of mathematics typically through the content of Algebra II and four years of rigorous, grade-level English. In 2014-15, Minnesota started requiring that all students complete a college- and career-ready course of study. Thus, the state's reporting of the four-year cohort graduation rate also serves as public reporting of the percentage of students completing a college- and career-ready course of study. Minnesota includes Pacific Islander students as part of the Asian subgroup reporting.

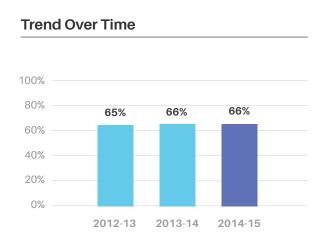

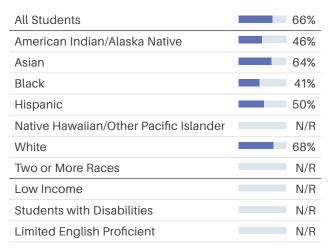

EARNING COLLEGE CREDITS WHILE IN HIGH **SCHOOL**

Students who earn college credits while in high school are more likely to enter college and succeed. This indicator reports the percentage of students that meet this benchmark.

PERCENTAGE OF STUDENTS EARNING A 3+ ON AN AP EXAM

Minnesota reports the percentage of Advanced Placement (AP) exams scored 3+ out of all exams taken by 9th-12th graders in 2012-13, 2013-14, and 2014-15. Adjusting the denominator to reflect all students in the cohort rather than tests taken would improve the stability of the indicator and paint a more complete picture. The state reports data for some but not all subgroups in 2014-15.

PERCENTAGE OF STUDENTS WHO HAVE COMPLETED COURSES FOR **COLLEGE CREDIT**

Minnesota reports the percentage of International Baccalaureate (IB) tests scored 4+ in 2014-15. The state does not report discrete data on students' successful dual enrollment course completion or meeting a combined measure of earning college credit, or the reporting does not meet Achieve's criteria for these indicators.

Completed IB/Earned College Credit

Completed Dual Enrollment Courses for College Credit

PREPAREDNESS FOR THE MILITARY

This indicator examines data from the U.S. Armed Forces enlistment examination and reveals the percentage of students who seek to enter the military but are not eligible to enter or are not prepared for higher-level education, training, and advancement opportunities offered by the U.S. Armed Forces.

Percentage Ineligible

POSTSECONDARY ENROLLMENT

Enrollment in a postsecondary institution is the first step to degree attainment. This indicator reports the percentage of the state's high school graduates who enter into postsecondary education. The extent of information reported varies based on whether data are available for in-state and out-of-state students along with whether data are available for two-year institutions, four-year institutions, or both.

PERCENTAGE OF STUDENTS ENROLLING IN POSTSECONDARY

Minnesota reports the percentage of high school graduates enrolling in two- and four-year, in- and out-of-state, public and private institutions of higher education the fall following graduation.

High School Graduates, Class of 2015

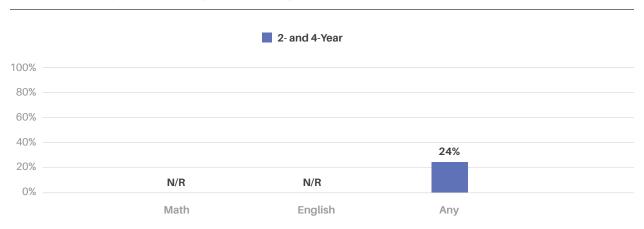

POSTSECONDARY REMEDIATION

Alarming numbers of students enter postsecondary institutions only to find out they need to enroll in — and pay for — remedial courses without earning college credit for these classes. This indicator reports the percentage of high school graduates who require postsecondary remediation.

PERCENTAGE OF STUDENTS IN REMEDIATION

Minnesota reports the percentage of the state's class of 2014 high school graduates attending the state's twoand four-year institutions who need any remedial courses in their first or second fall term. The state does not report data on math and English remediation needs.

Remediation by Institution Type and Subject Area

POSTSECONDARY PERSISTENCE

Too few students who start college ultimately earn a degree. This indicator reports the percentage of the state's high school graduates who enroll in a postsecondary institution and complete at least one year of postsecondary education in a designated amount of time or return to postsecondary education for a consecutive year.

PERCENTAGE OF STUDENTS PERSISTING BEYOND THE FIRST YEAR

Minnesota reports the percentage of high school graduates enrolling in two- and four-year, public and private institutions of higher education both in state and out of state who were retained for a second year of college.

High School Graduates, Class of 2014

2- and 4-Year (public and private, in- and out-of-state)

ACADEMIC PERFORMANCE OF ELEMENTARY AND MIDDLE SCHOOL STUDENTS

The National Assessment of Educational Progress (NAEP) monitors student achievement nationally and allows for comparisons across states. This indicator includes 4th and 8th grade reading and math results and 8th grade science results. Scale scores were rounded to the nearest whole number. Changes since 2005 were calculated based on differences between unrounded scale scores and then rounded to the nearest whole number.
